Syma,

It is most unfortunate that I didn't get to
know you as well as you better than I did. I take it for
granted that you are a very nice person and someone who needs to be
around people and someone who enjoys company. I am sorry that I did not try to know
you better, because I am sure we would have made great friends. It is really the
late now, because in 2 weeks I will be gone, but if I can leave here knowing
that we are friends, my case will not be in vain. Good Luck in everything
you pursue. The most charming
in life. I wish we could have
known each other better

Syma,

Here's to a real Sweet Kid
Because of William this must be a record
For time taken to sign a yearbook.
But I am with

Syma,
Even though it was a year
that went by so fast, I hope to
make our acquaintance next year
a lot better. Good luck to you and
your class.
Love
William Cooper

Syma Faye

Dear Syma
I'll never forget
the great study halls
the long talks about

in the years past I'll always
remember. You Syma so don't
worry if you ever must
talk I'll listen I'll love
to you always with

Dear Syma,
It was a pretty good
year wasn't it. Too
bad we weren't in any
classes like last year
with Mr. Monachino.
Remember him? how
could you forget. Maybe
we'll see more of each
other next year as
seniors.
Love,
Peggy Ryan

Syma Gaye,
In this bus I write
with delight? No bus
Darn bus won't stop
You are such a delightful person
so much going for you
the coming up year she
best will come for you. I don't
know where to start about
how much you did for B.P.G.
SO MUCH! Thank you ever so much!
Take care + the best for you!

The first part of the document is a list of names and dates, which appears to be a record of some kind. The names are written in a cursive script, and the dates are written in a more formal, printed style. The list is organized into columns, with names in the first column and dates in the second column.

1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as $t \rightarrow \infty$. It is shown that the solutions of the system (1) tend to zero as $t \rightarrow \infty$ if and only if the matrix A is Hurwitz.

Dear Syre
 I really said I was
 not to right as friends
 in an ever lasting
 circle going around
 with no belongings
 and never can end
 but now you are along
 and I remember ever
 and out to do
 there is only one person
 who means as much to
 me as you and I think
 you know what that is.
 I hope you will remember
 all the things (things) I have
 done this year and the
 even more number is this
 we can be next year
 so
 love
 Kaye

A black and white photograph of a group of approximately 12 people, mostly men, sitting and standing in a room. A large, tall, thin object, possibly a statue or a very tall person, is visible in the background near a doorway. The group is arranged in two rows, with some people sitting on chairs or the floor and others standing behind them. The room has a simple, possibly institutional, appearance with a doorway in the background.

Dear Syme,

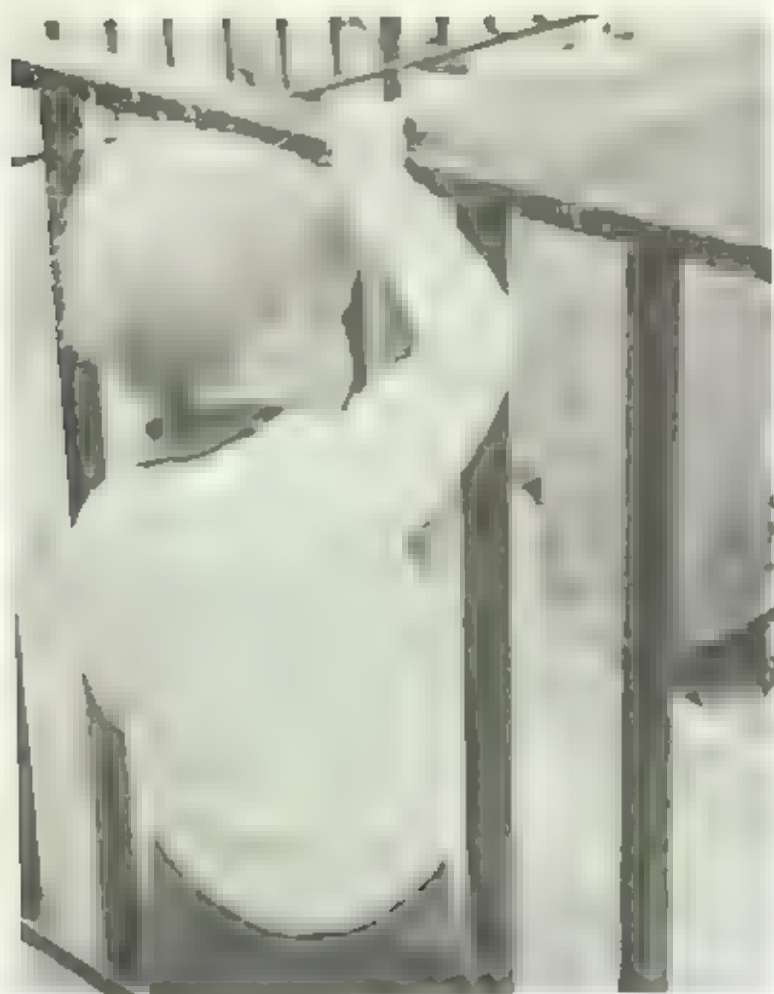

Where else should I sign

I sign your book except on a
page with flowers, the things that
have meant as much to us

~~to~~ Some of the greatest pleasure
you get out of life is in meeting new
people & making new friends. I guess
by meeting you, I've had my share of pleasures for
this year & even more. Between flowers, & giggles &
gins & gin balls & ice cream & cooked cabbage & the
association we have grown to know each other
really well. may I never ~~and~~

Love
